Our Culture, Our Competitive Advantage

Our ability to generate positive inflows also in bear markets is explained by our customer-oriented culture especially embodied in two specific areas:

- The **Investment strategy** we advocate to our customers that provides solutions according to an analysis of each customer's **needs** & is based on the concept of 'diversification'
- Our effective, innovative and committed Training & Communication strategy

GS European Financials Conference

Mediolanum's Investment Strategy

Investor **needs** remain fundamentally the same, they are not influenced by market crises

- We advise our customers proposing products & services that correspond to each of their **specific needs**
- We do not engage in stock-picking, tactical asset allocation decisions, or market-timing
- We recommend a series of **diversification** criteria, the most important being time horizon
- **Equity** investments are only considered for the **long term** (>10 yrs) and are diversified across the global economy to further reduce risk
- We strongly advise investors who have a long-term outlook to view market crises as buying opportunities

Our investment strategy explains the steadiness of our inflows & transfers 'technical performance' into 'customer performance'

Training & Communication in Times of Crisis

Designed to help customers understand the basic principles of our investment strategy, offsetting the negative messages from the media & word-of-mouth

- We prepare our Family Bankers through extensive, focused and ongoing **training**
- We provide our customers with effective education-oriented communication

(e.g. to convey the important message that in a down market a loss is incurred only if money is withdrawn from equity investments)

10

GS European Financials Conference

Investing in Credibility

Outstanding inflows fuelled by our **heavy investments in reputation** during the crisis

- Interest spread cut for all mortgage customers (June 2008, renouncing ~€ 65 mn of future revenues)
- Free protection against total permanent disability at no charge for all mortgage customers (July 2008, worth ~€65 mn over a 22-year time span)
- **3** Substitution of Lehman Brothers' bonds underlying I-L policies (October 2008, € 160 mn pre-tax, entirely born by the two major shareholders with no impact on minority shareholders)

Investments totalling €290 mn not in scale with a company with €130 mn in profits

but proportionate to the size of the company we want to become

On the Eve of a Positive Astral Alignment

We find ourselves in a position where we can exploit a set of very positive circumstances

- Strong market rebounds expected over the next 10-15 years correcting a 12-year period with no real progress in the stock exchanges, despite huge progress in technology and global GDP
- Chance to capture the **TFR stock** of our customers
- Continued emphasis on our 'Best Brands' funds of branded funds, the perfect embodiment of our investment strategy for the long term
- Possibility to take advantage of the success of the 'Freedom' products & services to keep acquiring new quality customers: further increase planned in advertising investment.
